

KinderPrep Supplemental Color Activity

You will need a clothespin or another way to mark the answer. Cut apart the cards – the picture of the object and the three small rectangles are all together on one card. Have your child say what color the object is and then have them clip the clothespin onto the color that matches the object. Using clothespins will help develop the muscles in their hands needed to hold a pencil.
